1017-30-201   **Alec L Matheson*** (`matheson@math.lamar.edu`), Department of Mathematics, Lamar
University, Beaumont, TX 77710. *Continuous functions in star-invariant subspaces.*

This talk will examine the continuous functions in the star-invariant subspaces of H^p. The existence of such functions was shown by Alexsandrov and further discussed by Dyakonov. This talk will discuss further properties of these continuous functions. (Received February 21, 2006)
