**Don W. Hadwin\*** ([don@math.unh.edu](mailto:don@math.unh.edu)), Mathematics Department, University of New Hampshire, Durham, NH 03824, and **Eric A. Nordgren**. *Generalized Multiplication and Composition Operators II*. Preliminary report.

This is a continuation of Eric Nordgren's talk. We consider tensor products of multiplier pairs and ask when they have cospaces. The definitive answer is "Sometimes!". We also investigate more examples of multiplier pairs. (Received February 21, 2006)
