1102-22-25 **William M. McGovern*** (`mcgovern@math.washington.edu`), Box 354350, University of Washington, Seattle, WA 98195. *Upper semicontinuity of Kazhdan-Lusztig-Vogan polynomials for certain blocks of Harish-Chandra modules.*

We show that the coefficients of Kazhdan-Lusztig-Vogan polynomials attached to certain blocks of Harish-Chandra modules satisfy a monotonicity property relative to the closure order on K-orbits in the flag variety. (Received June 24, 2014)
