1153-35-115 **Susan Friedlander*** (`susanfri@usc.edu`) and **Anthony Suen** (`acksuen@eduhk.hk`). *A Global Attractor for the Critical MG Equation.*

We discuss a drift diffusion active scalar equation arising in MHD. The fluid viscosity enters via the constitutive law. We prove the existence of a global attractor for the critical MG equation in the limit as the viscosity vanishes.

This is joint work with Anthony Suen. (Received August 20, 2019)
