1171-57-11   **Chi Cheuk Tsang*** (`chicheuk@berkeley.edu`). *Veering triangulations and pseudo-Anosov flows.*

We discuss the correspondence between veering triangulations and pseudo-Anosov flows without perfect fits. In particular we will outline an alternate proof of Schleimer and Segerman's result that veering triangulations induce pseudo-Anosov flows without perfect fits. This is joint work with Ian Agol.
