1167-13-307   **Haydee Lindo*** (`hlindo@hmc.edu`). *The Theory of Trace Modules over Commutative Rings.* Preliminary report.

I will speak on some recent developments in the theory of trace modules over commutative Noetherian rings. This will include applications of trace modules in understanding endomorphism rings and a discussion of ongoing work examining the relationship between trace ideals and modules having no self-extensions. (Received March 09, 2021)
