Bulletin (New Series) of the American Mathematical Society

This journal is devoted to articles of the following types:

Research-Expository Papers

These are, by definition, papers that present a clear and insightful exposition of significant aspects of contemporary mathematical research. Gibbs lectures, Progress in Mathematics lectures, and retiring presidential addresses will be included in this section.

Research Announcements

The purpose of this department is to publish quickly and disseminate widely significant new mathematics. A Research Announcement should be designed to communicate its contents to a broad mathematical audience and should meet high standards for clarity as well as mathematical content.

Book Reviews

Book Reviews are accepted for publication by invitation only. Unsolicited manuscripts will not be considered.

Subscription information. *Bulletin (New Series) of the American Mathematical Society* is published quarterly. Subscription prices for Volumes 26 and 27 (1992) are $202 list, $162 institutional member, $121 individual member. The subscription price for members is included in the annual dues. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $8.00; subscribers in India must pay a postage surcharge of $13.00. Expedited delivery to destinations in North America $12; elsewhere $21. Beginning in January 1992, the Bulletin will be available from the electronic service e-MATH [**telnet e-MATH.ams.com** (or **telnet 130.44.1.100**). Login and password are **e-math**.]

Back number information. For back issues see the *AMS Catalogue of Publications.*

Subscriptions and orders should be addressed to the American Mathematical Society, P. O. Box 1571, Annex Station, Providence, RI 02901-1571. *All orders must be accompanied by payment.* Other correspondence should be addressed to P. O. Box 6248, Providence, RI 02940-6248.

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

Bulletin (New Series) of the American Mathematical Society is published quarterly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213. Second-class postage is paid at Providence, Rhode Island and additional mailing offices. Postmaster: Send address changes to Bulletin, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248.

RESEARCH-EXPOSITORY PAPERS

Hirsch, Morris W. and Palais, Richard S. *Editors' remarks*, 1
Lenstra, H. W., Jr. *Algorithms in Algebraic Number Theory*, 211
Morgan, John W. *Λ-Trees and their applications*, 87
Palais, Richard S. *See* Hirsch, Morris W.
Parlett, Beresford N. *Some basic information on information-based complexity theory*, 3
Shelah, Saharon. *Cardinal arithmetic for skeptics*, 197
Struwe, Michael. *Semilinear wave equations*, 53
Traub, J. F. and Woźniakowski, H. *Perspectives on information-based complexity*, 29
Woźniakowski, H. *See* Traub, J. F.

RESEARCH ANNOUNCEMENTS

Albeverio, Sergio and Ma, Zhi-Ming. *A general correspondence between Dirichlet forms and right processes*, 245
Arapura, Donu. *Higgs line bundles, Green-Lazarsfeld sets, and maps of Kähler manifolds to curves*, 310
Boyer, C. P., Hurtubise, J. C., Mann, B. M., and Milgram, R. J. *The Atiyah-Jones conjecture*, 317
Brylinski, Ranee and Kostant, Bertram. *Nilpotent orbits, normality, and Hamiltonian group actions*, 269
Bunce, L. J. and Wright, J. D. Maitland. *The Mackey-Gleason problem*, 288
Burger, M., Li, J. S., and Sarnak, P. *Ramanujan duals and automorphic spectrum*, 253
Christ, Michael. *Some non-analytic-hypoelliptic sums of squares of vector fields*, 137
Deift, P. and Zhou, X. *A steepest descent method for oscillatory Riemann-Hilbert problems*, 119
Friedlander, Eric M. and Lawson, H. Blaine, Jr. *A theory of algebraic cocycles*, 264
Gelfand, I. M. and MacPherson, R. D. *A combinatorial formula for the Pontrjagin classes*, 304
Hauser, Herwig and Müller, Gerd. *Analytic varieties versus integral varieties of Lie algebras of vector fields*, 276
Hurtubise, J. C. *See* Boyer, C. P.
Kalai, Gil and Kleitman, Daniel J. *A quasi-polynomial bound for the diameter of graphs of polyhedra*, 315
Keen, Linda and Series, Caroline. *Pleating coordinates for the Teichmüller space of a punctured torus*, 141
Kleitman, Daniel J. *See* Kalai, Gil
Kostant, Bertram. *See* Brylinski, Ranee
Lawson, H. Blaine, Jr. *See* Friedlander, Eric M.
Levy-Bruhl, P., Mohamed, A., and Nourrigat, J. *Spectral theory and representations of nilpotent groups*, 299
Li, J. S. *See* Burger, M.
Lilly, Glenn M. *See* Milne, Stephen C.
Ma, Zhi-Ming. *See* Albeverio, Sergio
MacPherson, R. D. *See* Gelfand, I. M.
Mann, B. M. *See* Boyer, C. P.
Mihalik, Michael L. and Tschantz, Steven T. *Semistability of amalgamated products, HNN-extensions, and all one-relator groups*, 131
Milgram, R. J. *See* Boyer, C. P.
Milne, Stephen C. and Lilly, Glenn M. *The A_ℓ and C_ℓ Bailey transform and lemma*, 258
Mohamed, A. *See* Levy-Bruhl, P.
Müller, Gerd. *See* Hauser, Herwig
Nag, Subhashis. *A period mapping in universal Teichmüller space*, 280
Nourrigat, J. *See* Levy-Bruhl, P.
Ran, Ziv. *Lifting of cohomology and unobstructedness of certain holomorphic maps*, 113
Sarnak, P. *See* Burger, M.
Seip, Kristian. *Density theorems for sampling and interpolation in the Bargmann-Fock space*, 322
Series, Caroline. *See* Keen, Linda
Tschantz, Steven T. *See* Mihalik, Michael L.

INDEX TO VOLUME 26

White, Brian. *Nonunique tangent maps at isolated singularities of harmonic maps*, 125
Wright, J. D. Maitland. *See* Bunce, L. J.
Xie, Wenzheng. *A sharp pointwise bound for functions with L^2-Laplacians on arbitrary domains and its applications*, 294
Zhou, X. *See* Deift, P.

BOOK REVIEWS

Atiyah, Michael. *The geometry and physics of knots*, reviewed by Raoul Bott, 182
Aubin, Jean-Pierre and Frankowska, Helene. *Set-valued analysis*, reviewed by Jonathan Borwein, 157
Bejancu, Aurel. *Finsler geometry and applications*, reviewed by Hanno Rund, 148
Büchi, J. Richard. *Finite automata, their algebras and grammars: Towards a theory of formal expressions*, reviewed by Howard Straubing, 340
Bucklew, James A. *Large deviation techniques in decision, simulation, and estimation*, reviewed by Richard S. Ellis, 160
Cherry, William. *See* Lang, Serge
Cioranescu, Ioana. *Geometry of Banach spaces, duality mappings and nonlinear problems*, reviewed by Simeon Reich, 367
Efimov. *See* Golubov
Evans, Lawrence C. *Weak convergence methods for nonlinear partial differential equations*, reviewed by Michel Chipot and David Kinderlehrer, 147
Fomenko, Anatolii T. *Variational principles of topology. Multidimensional minimal surface theory*, reviewed by Fred Almgren, 188
Frankowska, Helene. *See* Aubin, Jean-Pierre
Fujita, Takao. *Classsification theories of polarized varieties*, reviewed by Andrew J. Sommese, 179
Golubov, Efimov, and Skvortsov. *Walsh series and transforms*, reviewed by W. R. Wade, 348
Karpilovsky, Gregory. *Induced modules over group algebras*, reviewed by Gerald Cliff, 193
Lakshmikantham, V., Matrosov, V. M., and Sivasundaram, S. *Vector Lyapunov functions and stability analysis of nonlinear systems*, reviewed by T. A. Burton, 344
Lang, Serge and Cherry, William. *Topics in Nevanlinna theory*, reviewed by Paul Vojta, 153
Matrosov, V. M. *See* Lakshmikantham, V.
Mawhin, Jean and Willem, Michel. *Critical point theory and Hamiltonian systems*, reviewed by M. S. Berger, 329
Palais, Richard S. and Terng, Chuulian. *Critical point theory and submanifold geometry*, reviewed by M. S. Berger, 329
Rumely, Robert S. *Capacity theory on algebraic curves*, reviewed by Ted Chinburg, 332
Schmüdgen, Konrad. *Unbounded operator algebras and representation theory*, reviewed by Palle Jorgensen, 152
Sivasundaram, S. *See* Lakshmikantham, V.
Skvortsov. *See* Golubov
Stépán, G. *Retarded dynamical systems: stability and characteristic functions*, reviewed by Kenneth L. Cooke, 175
Strauss, Walter A. *Nonlinear wave equations*, reviewed by Cathleen S. Morawetz, 360
Strooker, Jan R. *Homological questions in local algebra*, reviewed by Craig Huneke, 361
Terng, Chuulian. *See* Palais, Richard M.
Willem, Michel. *See* Mawhin, Jean
Ženišek, A. *Nonlinear elliptic and evolution problems and their finite element approximations*, reviewed by M. Dobrowolski, 336
Zwillinger, Daniel. *Handbook of differential equaitons*, reviewed by Ray Redheffer, 171

Book Reviews Editor: Murray H. Protter

Managing Editor: Frank S. Quinn

Editorial Information

As of February 1, 1992, the backlog for this journal was approximately 2 issues. This estimate is the result of dividing the number of manuscripts for this journal in the Providence office that have not yet gone to the printer on the above date by the average number of articles per issue over the previous twelve months.

A Copyright Transfer Agreement is required before a paper will be published in this journal. By submitting a paper to this journal, authors certify that the manuscript has not been submitted to nor is it under consideration for publication by another journal, conference proceedings, or similar publication.

Information to Authors

For Research-Expository Papers and Research Announcements, the first page must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. The *abstract* should be a brief technical description of the new material. Then, for Research Announcements, there should be an introductory section addressed to nonexperts describing the motivation, background, and significance of the results announced. Following the statement of results, there should follow a sketch of proofs which may be addressed to experts. An announcement should not exceed 7 published pages, and preferably not exceed 5 pages. For Research-Expository Papers and Research Announcements, included with the footnotes to the paper, there should be the 1991 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. This may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual index of *Mathematical Reviews*, published with the December issue starting in 1990, as

well as from the electronic service e-MATH [**telnet e-MATH.ams.com** (or **telnet 130.44.1.100**). Login and password are **e-math**]. For journal abbreviations used in bibliographies, see the list of serials in the latest *Mathematical Reviews* annual index. Authors are encouraged to supply electronic addresses when available. These will be printed after the postal address at the end of each article.

Electronically-prepared manuscripts. The AMS encourages submission of electronically-prepared manuscripts in $\mathcal{A}\mathcal{M}\mathcal{S}$-TEX or $\mathcal{A}\mathcal{M}\mathcal{S}$-LATEX because properly prepared electronic manuscripts save the author proofreading time and move more quickly through the production process. To this end, the Society has prepared "preprint" style files, specifically the amsppt style of $\mathcal{A}\mathcal{M}\mathcal{S}$-TEX and the amsart style of $\mathcal{A}\mathcal{M}\mathcal{S}$-LATEX, which will simplify the work of authors and of the production staff. Those authors who make use of these style files from the beginning of the writing process will further reduce their own effort.

Guidelines for Preparing Electronic Manuscripts provide additional assistance and are available for use with either $\mathcal{A}\mathcal{M}\mathcal{S}$-TEX or $\mathcal{A}\mathcal{M}\mathcal{S}$-LATEX. Authors with FTP access may obtain these *Guidelines* from the Society's Internet node e-MATH.ams.com (130.44.1.100). For those without FTP access they can be obtained free of charge from the e-mail address guide-elec@math.ams.com (Internet) or from the Publications Department, P. O. Box 6248, Providence, RI 02940-6248. When requesting *Guidelines* please specify which version you want.

Electronic manuscripts should be sent to the Providence office only after the paper has been accepted for publication. Please send electronically prepared manuscript files via e-mail to pub-submit@math.ams.com (Internet) or on diskettes to the Publications Department address listed above. When submitting electronic manuscripts please be sure to include a message indicating in which publication the paper has been accepted.

Copies of the paper should be sent directly to the appropriate Editor and the author should keep one copy. At that time authors should indicate if the paper has been prepared using $\mathcal{A}\mathcal{M}\mathcal{S}$-TEX or $\mathcal{A}\mathcal{M}\mathcal{S}$-LATEX. For Research-Expository papers, two copies of the manuscript should be submitted to Professor Richard S. Palais, Department of Mathematics, Brandeis University, Waltham, MA 02154-9110. For Research Announcements, four copies of the manuscript should be submitted to Professor Frank Quinn, Department of Mathematics, Virginia Tech, Blacksburg, VA 24061-0123. Research Announcements can also be submitted electronically in the standard TEX formats to bams@vtmath.math.vt.edu. The *Manual for Authors of Mathematical Papers* should be consulted for symbols and style conventions. The *Manual* may be obtained free of charge from the e-mail address cust-serv@math.ams.com or from AMS, Customer Services Department, P. O. Box 6248, Providence, RI 02940-6248.

Any inquiries concerning a paper that has been accepted for publication should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248.

Remarks on Research Announcements

The circulation of the *Bulletin* is larger by an order of magnitude than that of most research mathematics journals; it is received by essentially every

member of the Society. Space is limited to around 40 Announcements each year. These facts largely determine the qualities looked for in an Announcement:

The results should be, roughly speaking, among the 40 most significant or interesting achievements in mathematics in the year. The paper should contain background material for nonexperts which indicates why the results are significant and interesting.

The paper should be addressed to as wide an audience as possible, not just to experts. Strive for clarity and precision. Avoid jargon and introduce the terminology necessary to understand the main results. If space considerations prevent a full development, delineate clearly what is not being explained and provide references. The proof sketch can be more technical.

Ask a colleague to review your manuscript before you submit it. Even better, ask two colleagues, one whose work is close to yours, one whose work is farther away. (If you can't get two people you know to read your work before it is published, how many will want to read it after?) Ask for suggestions on how to improve the readability.

An abstract and the 1991 Mathematics Subject Classification are required. Papers submitted without these will be delayed.

(*Continued from back cover*)

Vector Lyapunov functions and stability analysis of nonlinear systems *by V. Lakshmikantham, V. M. Matrosov, and S. Sivasundaram*—**Reviewed by** *T. A. Burton* 344
