

PROCEEDINGS  
OF THE  
AMERICAN MATHEMATICAL SOCIETY

EDITED BY

ELDON DYER	A. P. MATTUCK
IRVING GLICKSBERG	IRVING REINER
M. H. HEINS	W. R. WASOW

WITH THE COÖPERATION OF

W. W. BOONE	W. H. J. FUCHS	H. S. SHAPIRO
D. A. BUCHSBAUM	MELVIN ROTHENBERG	HANS WEINBERGER
JOSHUA CHOVER	S. M. SHAH	J. A. WOLF

VOLUME 18, NUMBER 5  
OCTOBER, 1967

PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY  
PROVIDENCE, RHODE ISLAND

Proceedings of the American Mathematical Society

The PROCEEDINGS of the American Mathematical Society is devoted entirely to research in pure and applied mathematics, and the publication of original papers of moderate length. Articles for insertion should be typewritten and double spaced. Ditto is not generally satisfactory, although other modes of multiple reproduction may be. The maximum length of an acceptable paper is about 8 printed pages. (Since a page of the PROCEEDINGS contains about 400 words, a rule of thumb is that under 10 typed pages is probably within the limit, but that over 12 typed pages is probably too long.) The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. The authors should keep a complete copy of the manuscript, and should take the greatest possible care in preparing the original manuscript; hand drawn mathematical symbols are entirely satisfactory, if clearly done.

Very short notes (not to exceed 1 printed page) of an unusual nature are also accepted, and appear under the heading SHORTER NOTES. (Items deemed suitable include an elegant new proof of an important and well known theorem, an illuminating example or counterexample, or a striking synthesis of familiar results.)

Papers in algebra and number theory should be sent to ARTHUR MATTUCK, Room 2-275, Mathematics Department, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139, or to IRVING REINER, Mathematics Department, University of Illinois, Urbana, Illinois 61801.

Papers in modern or classical analysis should be sent to IRVING GLICKSBERG, Mathematics Department, University of Washington, Seattle, Washington 98105, or to MAURICE HEINS, Mathematics Department, University of Illinois, Urbana, Illinois 61801.

Papers in geometry or topology should be sent to ELDON DYER, Graduate Studies Division, City University of New York, 33 West 42nd Street, New York, New York 10036.

Papers in applied mathematics, differential equations, and related areas of analysis should be sent to WOLFGANG WASOW, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706.

Papers in probability, statistics, and related fields should be sent to JOSHUA CHOVER, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706.

Papers in logic, set theory, and related areas should be sent to W. W. BOONE, Mathematics Department, University of Illinois, Urbana, Illinois 61801.

All other communications should be addressed to the Managing Editor, M. H. HEINS, at the above address.

Inquiries from authors regarding reprints, or changes of addresses for mailing proofs, should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02904.

One volume of six issues is planned for 1967. The subscription price is \$12.00. Back issues (Vols. 1-17, 1950-1966) are available at the price of \$14.00 each.

The American Mathematical Society also publishes the following journals which accept research papers: BULLETIN, TRANSACTIONS and MATHEMATICS OF COMPUTATION. For details and the list of editors, please consult a recent issue. Reviews of the current mathematical literature of the world are published in MATHEMATICAL REVIEWS; editorial correspondence for this journal should be sent to: The University of Michigan, 416 Fourth Street, Ann Arbor, Michigan 48103.

---

The PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is \$12.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, P. O. Box 6248, Providence, R. I. 02904.

Second-class postage paid at Providence, Rhode Island and additional mailing offices. Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 34.40, paragraph d., P. L. & R.

Contents—Continued from back cover

Littlewood's diophantine approximation problem for series. By T. W. CUSICK.....	920
A variant of Tchebichef's minimax problem. By R. J. LEVIT.....	925
On odd perfect numbers. III. By D. SURYANARAYANA.....	933
On the vanishing of $H^n(X, \mathcal{F})$ for an $n$ -dimensional variety. By S. L. KLEIMAN.....	940
A generalization of the Göllnitz-Gordon partition theorems. By G. E. ANDREWS.....	945

SHORTER NOTES

Some theorems of Bloch type. By P. S. CHIANG and A. J. MACINTYRE..	953
A note on Cartan's Theorems A and B. YUM-TONG SIU.....	955
On the magnitude of $x^n - 1$ in a normed algebra. By L. J. WALLEN ..	956
Nonuniqueness of extremal kernels. By J. G. CAUGHRAN.....	957
Positive $H^{1/2}$ functions are constants. By J. NEUWIRTH and D. J. NEWMAN.....	958

## CONTENTS

Vol. 18, No. 5

OCTOBER, 1967

Whole No. 107

	Page
A generalization of Pellet's theorem concerning the zeros of a polynomial. By B. W. LEVINGER.....	767
Tauberian theorems for absolute summability. By J. S. RATTI.....	775
On boundary values of a schlicht mapping. By R. A. HORN.....	782
On analytic continuation to a schlicht function. By C. H. FITZGERALD	788
An inequality for linear transformations. By MARVIN MARCUS.....	793
An approximation method for Wiener integrals of certain unbounded functionals. By H. C. FINLAYSON.....	798
Remarks on some convergence conditions for continued fractions. By D. F. DAWSON.....	803
A maximality theorem in Fourier analysis. By ROBERT KAUFMAN ...	806
Bi-arc boundary functions. By L. E. SNYDER.....	808
An intrinsic metric for parts. By H. S. BEAR and M. L. WEISS.....	812
Bounded analytic functions and absolutely continuous measures. By GEORGE PIRANIAN, A. L. SHIELDS and J. H. WELLS.....	818
Another theorem on bounded analytic functions. By J.-P. KAHANE.....	827
A sequential F. and M. Riesz theorem. By E. A. HEARD.....	832
Analytic embedding and mean square approximation. By SAMUEL MERRILL, III.....	836
The Hahn-Banach extension and the least upper bound properties are equivalent. By W. E. BONNICE and R. J. SILVERMAN.....	843
On products of finite dimensional stochastic matrices. By M. P. SCHÜTZ-ENBERGER.....	850
Monotone subnets in partially ordered sets. By R. W. HANSELL.....	854
A note on reflexive Banach spaces. By K.-W. YANG.....	859
On type I $C^*$ -algebras. By SHÔICHIRO SAKAI.....	861
A completion for a quasi uniform space. By R. A. STOLTENBERG.....	864
Generalized conservation laws. By A. P. STONE.....	868
Continuous extensions. By C. J. R. BORGES.....	874
Inequalities for the difference body of a convex body. By G. D. CHAKERIAN.....	879
A remark on transitivity in bundles. By D. C. WEST.....	885
Approximation of certain continuous functions of $S^2$ into $E^3$ . By E. H. ANDERSON.....	889
On H. S. Ruse's theorems concerning parallel fields of planes in a Riemannian space with indefinite metric. By Y.-C. WONG.....	892
On the isomorphism problem for Lie algebras. By J. KNOPFMACHER	898
Prime $(-1, 1)$ rings with idempotent. By N. J. STERLING.....	902
The sharpening of a result concerning primitive ideals of an associative ring. By F. SZÁSZ.....	910
The isomorphic refinement theorem for direct sums of closed groups By PAUL HILL.....	913
